

RENEWABLE ENERGY IS ENOUGH

Citizen Literacy Series

Dr. Mara Prentiss, professor of physics at Harvard University, will discuss her book, *Energy Revolution*, and how we can shift entirely to renewable energy. On average renewable energy can supply more than 100% total current and future US energy consumption. How can we accomplish this in the US and how fast?

Citizen Literacy Series: science-media-civic literacy for an informed, engaged public.

TUESDAY
MARCH 6TH
7pm, Library
Assembly Room
